

## 2016-2017 Traditional & Kampo Medicine Article List

Volume	Issue	Clinical/Basic	Manuscript Category	Article Title	DOI
3	1	C	Original Article	Detection of prospective biomarkers of response to Japanese traditional (Kampo) medicines in patients with rheumatoid arthritis using immune response biomarker profiling	DOI: 10.1002/tkm2.1028
		B		Changes in liver lipidomics associated with sodium cholate-induced liver injury and its prevention by boiogito, a Japanese herbal medicine, in mice	DOI: 10.1002/tkm2.1032
		B		Combination of bofutsushosan (Kampo medicine) and voluntary exercise improves insulin sensitivity in Otsuka Long-Evans Tokushima fatty rats	DOI: 10.1002/tkm2.1034
		C		Efficacy of goreisan for asymptomatic bilateral and unilateral chronic subdural hematoma	DOI: 10.1002/tkm2.1035
		B		Enhanced cytotoxicity of nitidine against camptothecin-resistant A549 cells	DOI: 10.1002/tkm2.1036
		B		Cytosolic aspartate aminotransferase, a direct binding protein of kamikihito, regulates axon growth	DOI: 10.1002/tkm2.1037
		C		Graded meridian test program to prevent bullying: Preliminary study	DOI: 10.1002/tkm2.1038
		C	Short Communication	National cost estimation of maoto, a Kampo medicine, compared with oseltamivir for the treatment of influenza in Japan	DOI: 10.1002/tkm2.1027
		C		Analysis of licorice-induced pseudoaldosteronism in the Japanese Adverse Drug Event Report database	DOI: 10.1002/tkm2.1029
		B		Prophylactic repetitive shakuyakukanzoto treatment inhibits paclitaxel-induced mechanical allodynia in mice via peripheral effects	DOI:10.1002/tkm2.1039
		C	Case Report	Serial determination of serum IL-6, TNF- $\alpha$ , and IL-17 in a patient with rheumatoid arthritis successfully treated with kampo medicine: Case report and literature review	DOI: 10.1002/tkm2.1033
		C		Multiple organ dysfunction treated with kampo medicines in the intensive care unit	DOI: 10.1002/tkm2.1040
		C		Successful treatment of antibiotic-associated diarrhea with a herbal medicine, daiobotampito	DOI: 10.1002/tkm2.1041
		3	2	B	Original Article
C	Effect of donepezil and kamikihito combination therapy on cognitive function in Alzheimer's disease: Retrospective study			DOI: 10.1002/tkm2.1045	
B	Extract of metabolic products of <i>Bacillus subtilis</i> AK augments natural killer cell cytotoxic activity			DOI: 10.1002/tkm2.1046	
B	Saikokaryukotsuboreito during pregnancy protects rat neonates from maternal cannibalism and death in a neurolethyrism experimental model			DOI: 10.1002/tkm2.1047	
B	Traditional Japanese formulas tokishakuyakusan and ogikenchuto suppress dermal sclerosis in bleomycin-induced murine scleroderma			DOI: 10.1002/tkm2.1048	
C	Clinical efficacy of a traditional Japanese (kampo) medicine for burning mouth syndrome			DOI: 10.1002/tkm2.1049	
C	Identification of indicators of efficacy of the kampo formulation unkeito for cold syndrome, using a patient-based questionnaire database			DOI: 10.1002/tkm2.1050	
C	Relaxing effect of lower leg acupuncture in sedentary university students with regard to physical movement and autonomic nerve activity: Randomized controlled trial			DOI: 10.1002/tkm2.1052	
C	Kampo patterns and radiology in children receiving choreito for hemorrhagic cystitis after hematopoietic stem cell transplantation			DOI: 10.1002/tkm2.1053	
C	Differentiation of two Kampo formulae, yokukansankachimpihange and chotosan, for treatment of headache using a predictive model derived from a patient-based questionnaire database			DOI: 10.1002/tkm2.1054	
C	Economic evaluation of Kampo therapy			DOI: 10.1002/tkm2.1056	
B	Short Communication			Quick and easy preparation method for decoctions of kampo formula (part 3): Extraction efficiency of the IPCD method for volatile compounds	

		C		Utility of Japanese oriental medicine for the alternative target in the treating rheumatoid arthritis to target: 2014 recommendations update	DOI: 10.1002/tkm2.1051
		C		Preliminary study of the effects of orengedokuto on breath alcohol concentration	DOI: 10.1002/tkm2.1055
		B		Quick and easy preparation method for Kampo formula decoctions (part 4): IPCD method for rhubarb and aconite root	DOI: 10.1002/tkm2.1057
		C		Elevated direct bilirubin: Possible predictors for pseudoaldosteronism: Case-control study	DOI: 10.1002/tkm2.1058
		C	Case Report	Traditional herbal (kampo) medicine for musculoskeletal symptoms in menopausal women	DOI: 10.1002/tkm2.1043
4	1	C	Review	Usefulness and effectiveness of herbal medicines in stroke: Narrative review	DOI: 10.1002/tkm2.1065
		B	Original Article	Anti-tumor effects of nitidine on camptothecin-resistant A549 cells in a xenograft mouse model	DOI: 10.1002/tkm2.1059
		C		Usefulness of mineralocorticoid receptor antagonists, rather than angiotensin II receptor blockers, for the prevention and treatment of licorice-induced pseudoaldosteronism	DOI: 10.1002/tkm2.1063
		C		Classification of acute phase febrile upper respiratory tract infection: Retrospective chart review	DOI: 10.1002/tkm2.1064
		B		Ameliorative effect of sansoninto on sleep disturbance and spatial memory impairment in an Alzheimer's disease rat model	DOI: 10.1002/tkm2.1067
		B	Short Communication	<sup>13</sup> C-butyrate breath test is a novel non-invasive screening tool for anti-inflammatory activity of kampo medicines	DOI: 10.1002/tkm2.1068
		B		Effect of hachimijiogan on memory impairment induced beta-amyloid combined with cerebral ischemia in rats	DOI: 10.1002/tkm2.1069
		C	Case Report	Adverse event associated with auriculotherapy	DOI: 10.1002/tkm2.1062
		C		Self-administered rhubarb-free kyoseihatekigan has novel anti-asthma effects: Two case reports	DOI: 10.1002/tkm2.1070
4	2	C	Review	Abbreviation of kampo formulations and basic terminology in kampo medicine	DOI: 10.1002/tkm2.1078
		C	Original Article	Comparative efficacy of goreisan and probiotics in Japanese adults with acute infectious gastroenteritis: Randomized controlled trial	DOI: 10.1002/tkm2.1071
		B		Human placenta extract ameliorates memory dysfunction and dendritic atrophy in a 5XFAD mouse model of Alzheimer's disease	DOI: 10.1002/tkm2.1075
		B		Inhibitory effect of ucha-shinki-hwan on cold-mediated response in human dermal microvascular endothelial cells	DOI: 10.1002/tkm2.1077
		C	Short Communication	Antimicrobial effects of shin'iseihaito <i>in vitro</i> and clinical background factors of <i>Staphylococcus aureus</i> infection	DOI: 10.1002/tkm2.1073
		B		Oral sinensetin, but not nobiletin alone, prevents MK801-induced impairment of memory formation in mice, like nobiletin-rich chinpi, a kampo medicine	DOI: 10.1002/tkm2.1076
		C	Case Report	Effectiveness of rikkosan gargling for burning mouth syndrome	DOI: 10.1002/tkm2.1072
		C		Successful fertility-sparing surgery and chemotherapy for stage IC3 ovarian cancer with the postoperative use of the traditional Japanese herbal formulation hachimijiogan: A case report	DOI: 10.1002/tkm2.1074
